HAEVEN DICKERSON

PROBLEM SOLVER

ABOUT ME

Self-motivated creative/critical thinker specializing in JS full-stack development with a keen eye for UI design and passion for great user experience.

HIGHLIGHTS

Senior Platform Engineer – Rares.io – 1.5 years

- Developed an internal library of customizable React components enabling testing at component-level and significantly increasing product reliability.
- Advocated strongly for usability testing from which feedback was catalyst to numerous critical improvements in end-user experience.
- Progressively performed major refactor across multiple services, resulting in performance increase and improved reliability of platform architecture (low Lighthouse scores to passing).

Full-Stack Web Developer – CKH Consulting – 4 years

- Developed a Vue.js UI component library as an internal solution for streamlining development on incoming client feature requests.
- Designed an adapter for popular logging library, allowing client and Fortune 500 company RBA to migrate from Slack to MS Teams logging saving \$ thousands on monthly cost.
