ABOUT ME

Self-motivated engineeer specializing in full-stack development with a keen eye for UI design and passion for great user experience.

HIGHLIGHTS

Senior Platform Engineer - Rares.io ~ 2 years

- Developed an internal library of customizable React components enabling testing at component-level and significantly increasing product reliabilty.

- Performed progressive refactor across multiple microservices, resulting in performance increases and improved reliabilty of platform architecture (from low-failing benchmark scores to passing).

- Advocated strongly for usability testing from which feedback was catalyst to numerous critical improvements in end-user experience.

Full-Stack Developer - CKH Consulting - 4 years

- Developed a Vue.js component library as an internal solution for streamlining development on incoming client feature requests.

- Built an adapter for popular logging library, allowing client and Fortune 500 company RBA to migrate to MS Teams log channels, saving thousands of dollars on monthly cost.

- Lead a team of designers and developers implementing a custom SSO solution for RBA user-facing site.
